### How to Disable Internet Explorer 6's Pop-Up Blocker

If you are running Windows XP and have installed Service Pack 2; or if you're running Windows 98/Me/2000 and have installed Internet Explorer 6 SP1, you now have IE's pop-up blocker. The pop-up blocker may restrict functionality of RLC's Blackboard system. Follow these steps to disable the pop-up blocker for Blackboard only. These steps will NOT affect the pop-up blocker for any other site.

1. Open Internet Explorer
2. Choose Tools -> Internet Options
3. Click the Privacy tab
4. At the bottom, under Pop-up blocker, click Settings...

5. Add the domain "bb.rlc.edu" (without quotes), note the absence of "www".
6. Click "Close" then "OK."
